MONmouth Junction 7-4681

January 6th, 1953

The University of Wisconsin
College of Agriculture
Department of Genetics
Madison 6, Wisconsin

Attention: Mr. Joshua Lederberg,
Associate Professor of Genetics

Dear Mr. Lederberg:-

Enclosed is a copy of WHAT'S NEW FOR THE LABORATORY, published by Scientific Glass Apparatus Company, Inc., of Bloomfield, New Jersey.

You will note on Page 13, there is information in regard to polyethylene containers much like the type I believe you described to me on our trip to New York City.

Possibly you will be able to investigate the qualities of these type containers to suit your particular purpose.

Very truly yours,

JOHN C. DOLPH COMPANY
